Experience

Software Engineer

Calfus Technologies, Pune - 11/2022

Project – Machinery Max

- Machinery Max is a web application designed exclusively for Machinery Max clients.
- The platform offers two distinct processes: the fixed rate process and bidding process.
- Users can log in using valid credentials to access the application.
- For valid user verification used access token and refresh token from json web token .
- Once logged in, users can view active lots and place bids on them.

- The application organizes lots into events, with each event consisting of multiple lots.
- The platform includes various forms such as register user, login, contact us, and support.
- Reusable components like buttons and dropdowns have been implemented for a seamless user experience.
